

“The park has provided much-needed greenery and a leisure area in a very residential area space and is now well-used by the local community and nearby schools.”

**Ken Bibby**  
Friend of the Lily Park

## Friends of the Lily Park

### Project:

Completion of shrubberies

### Subject:

Environmental improvements  
Facilities and building improvements

### Location:

Redcar, Redcar and Cleveland

### Overview:

Once a thriving park with a pond, the Lily Park was completely flattened when the water authority excavated the area to install underground storage tanks.

Volunteers have worked hard to improve the park beyond recognition, installing winding footpaths and planting of hundreds of shrubs and trees.

The group contacted the Foundation when they unfortunately ran out of funds to complete the project, and were given a £2,000 grant to purchase and plant the remaining shrubs and trees.

The project provided a fantastic community activity, with children from local schools helping to plant the bulbs.
